This line-up is subject to change but proper batting orders will be sent at the time these changes are made. The numbers on the back of the uniform for the identification of the player will always remain the same with slight exception.

The Cubans have 5 three hundred hitters in their line-up and they are busting that apple at a rapid pace. The infield and outfield is airtight with plenty of replacements. The Catcher Luis Lauden is one the games number 1 receivers. Lauden is reputed to have the greatest arm of the catchers in the Negro National League he throws with uncanny accuracy and it is suicide to attempt to steal on Lauden. Ceimbre last years hitting star, finished well over 400 last year, is out to lead the league again this year. The Cubans have a millen dollar infield in Nec Rodriguez at third, Horatio Martinez at short, Gil Garrido at second and Showboat Thomas or Linares at first base. With Xavier Perez and Cox to able performers to back us this array of stars.
